« I believe m-I-Ik can fly ... »

Hôpitaux Universitaires Genève

I BELIEVE MILK CAN FLY...

- 27 2/7 GA boy
- Dutch family on holiday
- Uneventful clinical course
- Enteral nutrition
 - D1: donor milk
 - From D2: own mother's milk
 - Breastfeeding project
- At 34 w: medical repatriation

Over than 100L of frozen mother milk in stock

Unrecognized hyperlactation

BUT HOW CAN MILK FLY?

- Flight company & transport team: NO experience
- Transporting preterm newborn: easy
- Transporting frozen milk? IMPOSSIBLE
- No plugs for electric cool box in the plane

AND IF WE USED DRY ICE?

sering smoke sensors tbites

WE DID IT! necessary
